Different on Netflix and some websites.</p> <p>Special keys help you give directions to your computer about your cursor or mouse pointer. Review: Arrow keys, Backspace key, Space bar (only 1 space between words), and Enter key.</p> <p>Remember to tap a key and lift your finger up. Holding down a key for too long will type lots of the same letter!</p> <p>Don't worry - we will review these throughout the year so you will become familiar with them.</p>
